MICHAŁ WDOWIK

FRONTEND DEVELOPER   📍 WARSAW, POLAND

My goal is to deliver high-quality, reusable code while continuously expanding my skill set to become a full-stack developer in the future. To achieve this, I actively seek out reputable sources of knowledge like workshops/lectures on Frontend Masters offered by experienced developers. I am passionate about web development, my favorite technologies are **React** and **JS**. Thanks to my open attitude and high commitment, I quickly adapt to a new environment. You can find me on Codewars and Twitter, where I share links that have helped me understand various technologies. I appreciate every form of feedback as it helps me improve. Currently, at **Lemmy**, I'm part of a team creating software for hardware-based vinyl playback. I also handle frontend tasks for **Binatec**.

SKILLS

- React
- TypeScript
- JavaScript
- Html & Css
- Git & Github
- Node.js
- Storybook
- CI/CD
- Rest API
- Agile/Scrum/Jira
- RWD
- Figma
- Tailwind
- Styled Components
- Material UI
- ESLint & Prettier
- Cypress e2e tests
- React Query

🎵 LEMMY

Frontend Developer Intern / Full-time

`AGILE/SCRUM/JIRA` `STORYBOOK` `NODE.JS` `REACT.JS` `TYPESCRIPT` `REACT QUERY` `GIT` `FIGMA` `REST API` `CI/CD` `CLOUD FUNCTIONS` `STYLED COMPONENTS`

🅱 BINATEC

Frontend Developer / Part-time

`TYPESCRIPT` `REACT.JS` `CYPRESS` `PWA` `RWD` `PRETTIER` `TAILWIND CSS` `ESLINT`

EXPERIENCE

- Key role in developing an app for hardware-based vinyl playback control
- Actively participated in an Agile Scrum development approach, attending planning meetings, daily updates, and review sessions using Jira
- Created reusable components integrated into Storybook
- Collaborated with developers to craft UI aligned with Figma designs
- Managed code using Git and GitHub, promoting smooth collaboration and version control between teammates
- Established CI/CD and cloud functions
- Managed backend tasks, connecting with Discogs API for vinyl searches
- Enhanced teamwork through pair programming

- Transformed designer's Figma layouts into responsive React components
- Utilized React's good practices to develop app with reusable components
- Collaborated with a backend developer to implement an AI-powered customer chatbot and comments section
- Optimized loading time and performance of Binatec's website

PORTFOLIO
